

ADITYA RAJ

FULL-STACK SOFTWARE ENGINEER & UI/UX DEVELOPER

adityaraj.xoxo@gmail.com | 9801365390 | Portfolio | GitHub | LinkedIn

EXECUTIVE PROFILE

Multidisciplinary Full-Stack Developer bridging high-end UI/UX design with robust backend architecture. Specialized in creating scalable, premium digital experiences and complex system architectures, from luxury e-commerce interfaces to AI-driven desktop environments.

TECHNICAL ARSENAL

Core Engineering	Java, Python, Data Structures & Algorithms (DSA)
Backend Development	Node.js, Express, MongoDB
Frontend & Interface	JavaScript, React, HTML, CSS, Figma, Electron
Infrastructure & Tools	Git, GitHub, Digital Marketing, SMM

SELECTED PROJECTS & VENTURES

Velovictoria

Luxury Fashion Brand — UI/UX & Web Development

- Spearheaded the UI/UX design and developed the web interface for a premium digital storefront.
- Engineered a seamless, high-performance user journey tailored specifically to the visual and functional standards of the luxury fashion sector.

Valantric

Web Development Agency Platform

- Developed comprehensive web solutions tailored for a modern development agency, ensuring scalable deliverables and refined user interfaces.

Asha Assistant

Emotion-driven AI Chatbot Application

- Built a specialized desktop application using Electron integrated with VRM (Virtual Reality Modeling) technologies.
- Programmed dynamic, emotion-driven AI conversational mechanics to create a deeply interactive user experience.

ORIGIN-X

Artificial-Life Simulation

- Engineered a complex artificial-life simulation ecosystem in Python, leveraging advanced algorithmic logic to model behaviors and environments.

Celmora

Backend & Authentication Architecture

- Directed the backend architecture and developed secure, scalable user authentication protocols for a collaborative team project.
